introduction

Greetings people of LaTeX. This is a new language intended to replace LaTeX!

A Random List

- First
- Second
- Third

OR?

1. First
2. Second
3. Third

Image

Solarpunk as shown in Figure 1 is a new concept introduced by one of the famous artists whose name I do not recall, sadly.

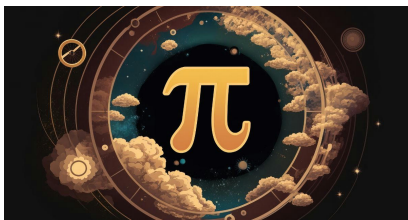

Figure 1: *Solarpunk* is an alternative perspective on the world compared to the most common *Cyberpunk*!

Mathematics

Unlike LaTeX $ insert math definition here $ does not make it an inline function only. It's a unified method to write math functions where Typst is the one determining whether it is an inline function or not!

$$Q = \rho A v + C$$

Or with text:

$$Q = \rho A v + \text{time offset}$$

Example function showcasing: total displaced soil by glacial flow:

$$7.32 \ \beta + \sum_{i=0}^{\nabla} \frac{Q_i(a_i - \varepsilon)}{2}$$

Vectors

$$v := \begin{pmatrix} x_1 \\ x_2 \\ x_3 \end{pmatrix}$$

Cool/Custom Functions

We can also write custom functions which allows us to do whatever the function defines.

Examples:

You are ⬚ beautiful ⬚! I am ⬚ amazed ⬚!

Critical List!

- Food today?
- Work deadline
